

These files contain information on the Water Level measurement network for the Caribbean region as presented to the GLOSS IX Meeting in Paris on 24-25 February, 2005. Information was collected as part of a survey by IOCARIBE-GOOS. Information was obtained from numerous sources; for the most part it is uncorroborated, and we do not claim it to be exhaustive. We welcome input from individuals with access to updated or previously missing information. Following the GLOSS IX meeting, the information will be posted and updated on the web site www.iocaribegoos.org.
